Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Application No. Applicant(s) 10/537,365 GOLDBACH ET AL. Office Action Summary Examiner Art Unit JAMES K. HSIAO 3683 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHOPTENED STATI ITODY REDIOD FOR DEDLY IS SET TO EXPIDE 2 MONTH(S) OR THIRTY (30) DAYS

WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. Failure to reply within the set or extended period for reply will by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filled, may reduce any earned patient term adjustemers. See 37 CFR 1.7040 is
tatus
1) Responsive to communication(s) filed on <u>30 January 2008</u> .
2a) ☐ This action is FINAL . 2b) ☑ This action is non-final.
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.
isposition of Claims
4)⊠ Claim(s) 20 and 25-30 is/are pending in the application.
4a) Of the above claim(s) is/are withdrawn from consideration.
5) Claim(s) is/are allowed.
6)⊠ Claim(s) <u>20 and 25-30</u> is/are rejected.
7) Claim(s) is/are objected to.
8) Claim(s) are subject to restriction and/or election requirement.
pplication Papers
9)☐ The specification is objected to by the Examiner.
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d)
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.
riority under 35 U.S.C. § 119
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a)

Р

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).			
a)∏ All	b) Some * c) None of:		
1.	Certified copies of the priority documents have been received.		

- 2. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last
 Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

- The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior at are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 20, 25, 26, 27, 29, and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weng (US-5597053) in view of Whitworth (US-1576811).

 Regarding claims 20, 25, 29, and 30, Weng discloses a brake pad having a lining support formed of a first material (fig 1), a friction lining adjacent the lining support (fig 1), a plurality of studs (30) of different lengths (studs that insert into 10), formed of a second material (abstract) which is softer than the first material fixed to the lining support, wherein at least one of the plurality of studs is enclosed in the friction lining (fig 1) and at least another of the plurality of studs passes though the friction lining up to a lining surface of the friction lining (fig 1), wherein the studs abrade with the lining surface of the friction lining during braking (abstract).

Weng lacks to disclose the use of a non ferrus metal as the second material.

Whitworth teaches a material of a soft brass material (20). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the

Application/Control Number: 10/537,365

Art Unit: 3683

brake lining of Weng with the soft brass of Whitworth because attaching the brass studs to a harder material makes a permanent and satisfactory welded joint with the steel of a lining support (col. 2, lines 81-87).

Regarding claims 26-27 Weng lacks to disclose a method of welding. Whitworth teaches a method for attachment of studs (40) to a lining support (14)'comprising forming the studs from a soft brass material and the lining support from a harder material. (Fig 7-9) It would have been obvious to one of ordinary skill in the art to attach brass studs to a harder material since brass makes a permanent and satisfactory welded joint with the steel of the lining support as taught by Whitworth. (Column 2, lines 81-87)

 Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Weng (US-5597053) in view of Hoffrichter et al. (US-6851527).

Regarding claim 28, Weng lacks a layer in between the lining and the lining support. Hoffrichter teaches a layer in between the lining and the lining support (4).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the brake pad of Weng with layer of Hoffrichter in order to provide a damping layer in the braking pad.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAMES K. HSIAO whose telephone number is (571)272-6259. The examiner can normally be reached on Monday through Friday 8:30 am to 5:00 pm.

Application/Control Number: 10/537,365 Page 4

Art Unit: 3683

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Siconolfi can be reached on 571-272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
